

May is Osteoporosis Awareness Month

OSTFOPOROSIS BY THE NUMBERS

The time is NOW to diagnose and treat this silent killer responsible for 2 million fractures and \$52B in societal costs in 2018.

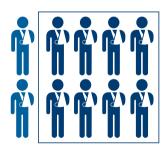

Osteoporosis is Comn

1 IN 2 TO WOMEN 1 and up to 4 TO TO TO MEN

[OVER AGE 50]
WILL BREAK A BONE DUE TO OSTEOPOROSIS

Osteoporosis is treatable, if not preventable

84% NOT TESTED OR TREATED

The disease is responsible for an estimated two million broken bones per year, yet nearly 84 percent of older Americans who suffer bone breaks are not tested or treated for osteoporosis.

50% OF REPEAT FRACTURES COULD BE AVOIDED with cost-effective and well-tolerated treatments

EACH YEAR IN THE U.S., APPROXIMATELY

EACH YEAR IN THE U.S., APPROXIMATELY 300,000 HIP FRACTURES OCCUR

10steoporosis is serious, even deadly.2

Approximately Americans who experience a hip fracture d the year following the fracture.

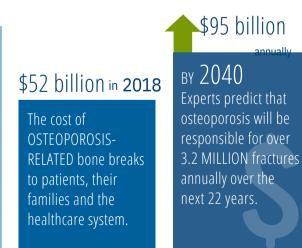

Anoth 5, 400 ricans move

from the hosipital to a nursing hand never return "home."

The remaining Americans

never regain their previous function. Six months after a hip fracture, only 15 percent of patients can walk across a room unaided.

Osteoporosis is Costly.3
